

### Retrofit Cartridges for Competitive Systems

The CunoOCS® line of filtration products are carefully designed to protect beverage equipment, provide consistent beverage quality, and ensure seamless beverage service.

The CunoOCS retrofit cartridges upgrade the performance of existing competitive systems with the same premium performance and design characteristics as the Series 500 and 700.

The cartridge design offers simple changeouts while minimising corrosion potential often seen in metallic housings.

The sanitary quick change design minimises contamination of the filtration media, while the compact design allows the unit to be installed conveniently behind the beverage unit or under a cabinet.

The housing is durable and shatter-resistant, minimising the potential for leaks.

Units are FDA, CFR-21 compliant for use in all food and beverage applications and are 3rd party certified for design and performance.

Three premium carbon technologies are available for differing water conditions.

---

#### Maximum Protection

CS-25

**Capacity:** 7,500 litres

**Features**

- Graded density, compressed carbon block
- 0.5 micron cyst, turbidity, fine sediment reduction
- Chlorine taste and odour reduction

**Benefits**

- Does not require activation
- Extends contact time for maximum chlorine and sediment reduction
- Maximum protection and long life
- Enhances beverage quality over the life of the filter

---

#### General Purpose

CS-15

**Capacity:** 9,400 litres

**Features**

- Graded density, multi-composite carbon block
- 1 micron sediment reduction
- Chlorine taste and odour reduction

**Benefits**

- Does not require activation
- Enhances beverage clarity
- Enhances beverage quality over the life of the filter

---

#### Problem Water

CS-65

**Capacity:** 9,000 litres

**Features**

- Built-in 5 micron prefiltration for heavy sediment reduction
- Chlorine taste and odour reduction

**Benefits**

- Suitable for water conditions with heavy dirt load
- Reduces maintenance caused by clogged valves and orifices
- Enhances beverage quality over the life of the filter

### Applications/Specifications

Model	Part #	System Dimensions cm	Chlorine Taste/Odour	Sediment Reduction	Heavy Sediment	Cyst Removal	Turbidity Reduction	Capacity litres	Flow Rate lpm	Carton Wt. kilos	Carton Dimensions cu. m.	Case Qty.
CS-25	1157046	28.3 x 8.6	✓	✓		✓	✓	7,500	3.78	11.8	0.05	12
CS-15	1157044	28.3 x 8.6	✓	✓				9,400	3.78	11.8	0.05	12
CS-65	1157050	28.3 x 8.6	✓		✓			9,000	3.78	11.8	0.05	12

For the filtration of cold water only. This product is for commercial use only. All materials are FDA compliant with CFR title 21.

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts. EPA Establishment No. 070595-CT-001

The following CunoOCS products are NSF listed:

- CS-25/CS-25
- CS-15/CS-15
- CS-65/CS-65

Refer to the performance data sheet supplied with the system for the certified claims.
